NHS CELEBRATION DAY FUN SHEET

Did you know that Florence Nightingale helped lay the foundations for the way that our NHS works today?

Florence Nightingale was born on 12th May 1820 in Florence, Italy. After training to be a nurse in Germany, Florence became famous while serving as a nurse during the Crimean War by helping thousands of injured soldiers.

After moving to England, Florence laid the foundations of professional nursing with the establishment of her nursing school at St Thomas' Hospital in London. It was the first nursing school in the world, and is now part of King's College London.

In recognition of her pioneering work in nursing, the Nightingale Pledge is taken by all new nurses and International Nurses Day is celebrated on her birthday.
